

ABSTRACT OF THE DISCLOSURE

COMPUTER MANAGEMENT SYSTEM

- 5 A management system is provided for the generation of a management object model for performing management of a computer system. The object model includes a structured hierarchy of objects representing components of a computer system. The management system can include component modules operable to define mappings from instrumentation of the components to objects representing those components and
- 10 configuration modules operable to configure associations between the component modules for the generation of the management object model.
